

## Clarity VoIP

## Capturing the power of the Internet

You can access Clarity Telecom's VoIP services through a range of different devices including your mobile phone.

### Range of Devices

- Softphone which can be downloaded from our site along with the required settings
- The world's leading range of SIP phones (IP handsets)
- A telephone adaptor ATA which converts a regular telephone into a IP phone.
- Wi-fi phones
- Traditional phones including mobile phones

### Low cost Calls

- Clarity are one of the leaders in routing IP telephone calls and services, with IP servers in London Belfast and Dublin. Most of our pricing tariffs are lower than Skype and as usual all calls between VoIP accounts are free.

Unusually for a VoIP provider we have a large team of technical advisors who will help you with any configuration or firewall issues you might have. Please see our Web site for the expanded range of VoIP services.
